

# STATE OF GLOBAL AIR /2020

## ABOUT

The State of Global Air report and interactive website bring into one place a comprehensive analysis of the levels and trends in air quality and health.

They are produced annually by the Health Effects Institute and the Institute for Health Metrics and Evaluation's (IHME) Global Burden of Disease (GBD) study and are a source of objective, high-quality, and comparable air quality data and information. These are the most up-to-date assessments.

Visit [www.stateofglobalair.org](http://www.stateofglobalair.org) to learn more.

## WHO IS IT FOR?

The report and website give citizens, journalists, policy makers, and scientists free access to reliable, meaningful information about air pollution exposure and its health effects.

## WHAT'S NEW IN 2020?

For the first time, State of Global Air 2020 reports on how air pollution affects newborns.

## WHAT AIR POLLUTION DO WE TRACK?

- Ambient particulate matter (PM<sub>2.5</sub>)
- Ground-level ozone
- Household air pollution from the use of solid fuels for cooking

## HOW CAN I EXPLORE THE DATA?

The State of Global Air interactive website offers tools to explore, compare, and download data and graphics for over 200 countries, reflecting the latest air pollution levels and associated burden of disease from 1990 to 2019.
